

# SELF SUPPORTING FIBRE OPTIC DROP CABLE

One core flat drop cable is for Fibre To The Home (FTTH) application. The cable is constructed with 1.2mm galvanized steel wire self supporting messenger, two galvanized steel wire strength member and LSZH outer jacket for ultraviolet light protection and external use. It is very light in construction and easy to install, generally used for connecting Main distribution frame to consolidation point at home, apartment or offices. Industry standard connectors can be used for direct termination because of standard 250µm fibre size.
