

1- 1/4" FOAM DIELECTRIC RF CORRUGATED COAXIAL CABLE

Norden 1- 1/4" Foam Dielectric RF Corrugated Coaxial Cable is used for base stations which includes wireless mobile communication, cellular, microwave and broadcast applications. It incorporates high foaming polyethylene insulation technology to minimize signal loss and have excellent electric features such as low damping and reflection coefficient. This cable carries current in both inner and outer conductors. It's ideal for applications where the RF cable has to be routed through or around buildings and where precise bending and handling is needed in tight spaces.
